

Potts & Monger Sanitation, Inc. carries a great selection of roll off dumpsters so that no matter what the size of your driveway or street, we have a dumpster that will fit perfectly into any space.

### **15 Yard Roll-off Container:**

Height {A} = 40 Inch  
Width {B} = 96 Inch  
Length {C} = 192 Inch - 216 inches

A 15 yard dumpster can hold 15 cubic yards of waste. Common dumpster dimensions are list under each container size. There is no perfect way to choose dumpster sizes, but a 15 yard dumpster may be appropriate for a small basement or 1 car garage clean out; removing a 325 square foot deck; removing 2200 square foot of single layer shingles, or a small kitchen and bath remodeling job. This container is approx. equal to 5 - 7 pickup truck loads.

### **16 Yard Roll Off Container:**

Height {A} = 42 Inch  
Width {B} = 96 Inch  
Length {C} = 192 Inch - 216 inches

A 16 yard dumpster can hold 16 cubic yards of waste. Common dumpster dimensions are list under each container size. There is no perfect way to choose dumpster sizes, but a 16 yard dumpster may be appropriate for a small basement or 2 car garage clean out; removing a 350 square foot deck; removing 2350 square foot of single layer shingles, or a small kitchen and bath remodeling job. This container is approx. equal to 6 - 8 pickup truck loads.

### **20 Yard Roll Off Container:**

Height {A} = 60 Inch  
Width {B} = 96 Inch  
Length {C} = 192 Inch - 216 inches

A 20 yard dumpster can hold 20 cubic yards of waste common dumpster dimensions are list under each container size. There is no perfect way to choose dumpster sizes. These containers are typically used for roofing debris, window replacements for a home, 2 car garage construction, scrap metal, renovation of a basement, siding from a small house or garage, and debris from a deck of about 430 square foot or a roof of about 3000 square foot. This dumpster is approx. equal to 7 - 10 pickup truck loads.

### **27 Yard Roll Off Container:**

Height {A} = 72 Inch  
Width {B} = 96 Inch  
Length {C} = 192 Inch - 216 inches

A 27 yard dumpster can hold 27 cubic yards of waste common dumpster dimensions are list under each container size. There is no perfect way to choose dumpster sizes. These containers are typically used for large construction or remodeling projects requiring the removal of large amounts of debris including scarp metal, demolition, roofing, and siding, debris from a deck of about 580 square foot. We do not recommend this size dumpster for roofing jobs due to weight allowances. This dumpster is approx. equal to 9 - 13 pickup truck loads.
